

McClerklin Skin & Laser Center

Patricia A. McClerklin, M.D., P.A.

Fellow, American Board of Dermatology

Dermatologic Surgery & Laser Surgery
Diseases and Surgery of the Skin, Hair and Nails

LASER HAIR REMOVAL CONSENT FORM

I hereby authorize and direct any associates or assistants of Dr. McClerklin to perform laser assisted hair removal on me. I understand that this procedure works on the growing hairs and not on dormant hairs. For this reason, complete destruction of all hair follicles from any one treatment is unlikely, and I understand that I will require several treatments to obtain a significant, long-term reduction of hair growth. I also understand that I will require several treatments to obtain a significant, long-term reduction of hair growth. I also understand that some people may not experience complete hair loss even with multiple laser procedures.

The following points have been discussed with me:

- The potential benefits of the proposed procedure
- The possible alternative procedures
- The probability of success
- The reasonable anticipated consequences if the procedure is not performed
- The most likely possible complications/risks involved with the proposed procedure and subsequent healing period, including, but not limited to injection, scarring, crusting, re-growth of hair, and/or blistering.
- Post treatment instructions.

I am aware of the following possible experiences/risks with Laser Surgery:

- DISCOMFORT – Some discomfort may be experienced during laser treatment.
- WOUND HEALING – Laser Surgery can result in swelling, blistering, crusting, or flaking of the treated areas, which may require one to three weeks to heal. Once the surface has healed, it may be pink or sensitive to the sun for an additional two to four weeks, or longer in some patients.
- BRUISING/SWELLING/INFECTION – With some lasers, bruising of the treated area may occur. Additionally, there may be some swelling noted. Finally, skin infection is a possibility, although rare, whenever a skin procedure is performed.
- PIGMENT CHANGES (Skin Color) – During the healing process there is a slight possibility that the treated area can become either lighter or darker in color compared to the surrounding skin. This is usually temporary, but on rare occasion, it can become permanent.
- SCARRING – Scarring is a rare occurrence, but it is a possibility when the skin's surface is disrupted. To minimize the changes of scarring, it is a possibility when the skin's surface is disrupted. To minimize the chances of scarring, it is IMPORTANT that you follow all post-treatment instructions carefully.
- EYE EXPOSURE – Protective eyewear (shields) will be provided. It is important to keep these shields on at all times during the treatment in order to protect your eyes from accidental laser exposure.

ACKNOWLEDGEMENT

I UNDERSTAND AND ACKNOWLEDGE THAT PAYMENTS FOR THE ABOVE PROCEDURE ARE NON-REFUNDABLE.

BY MY SIGNATURE BELOW, I CERTIFY THAT I HAVE READ AND FULLY UNDERSTAND THE CONTENTS OF THIS PERMISSION FORM FOR LASER HAIR REMOVAL TREATMENT, AND THAT THE DISCLOSURES REFERRED TO HEREIN WERE MADE TO ME.
